Περίληψη Πρόσκλησης:	<u>Objectives</u> The "Teaming for Excellence" call aims to create new or modernize existing centers of excellence in Widening countries through strategic partnerships with leading institutions abroad. The initiative seeks to strengthen research and innovation capacities by fostering collaboration between institutions in less developed regions and top-tier counterparts. A key objective is to secure complementary investments from structural funds or other sources to amplify the impact of these centers. The call follows a two-stage application process, with the first stage focusing on the submission of draft proposals and the second stage on detailed proposals. <u>Actions</u> This call covers the following topic: HORIZON-WIDERA-2025-ACCESS-01-01: Teaming for Excellence.

Περίληψη Πρόσκλησης:	<u>Objectives</u> The call aims to facilitate and support judicial cooperation in civil and criminal matters, promoting the rule of law, independence, and impartiality of the judiciary. It seeks to improve the effectiveness of national justice systems and the enforcement of decisions. The priorities include enhancing judicial cooperation in civil matters, particularly in cross-border disputes and family law; promoting judicial cooperation in criminal matters, focusing on mutual recognition instruments and addressing issues like detention conditions and radicalization prevention; and supporting Member States in establishing and strengthening national networks active in judicial cooperation. The expected outcomes are increased capacity of national practitioners, improved cross-border cooperation, alignment of administrative practices with EU legislation, and better implementation of EU judicial cooperation instruments. <u>Actions</u> This call covers the following topics: JUST-2025-JCOO: Action grants to promote judicial cooperation in civil and criminal matters.

Προθεσμία Υποβολής:	21/10/2025
Περίληψη Πρόσκλησης:	COST invites European researchers and innovators to submit proposals for Actions aiming to address scientific, technological and societal challenges. These challenges shall be addressed by promoting and spreading excellence, fostering interdisciplinary research for breakthrough science and empowering and retaining young researchers and innovators. COST brings together researchers and innovators to jointly develop ideas and initiatives across all fields of science and technology through cooperation across Europe and beyond. COST encourages and fosters trans-, multi- and interdisciplinary approaches by integrating researchers and innovators from different fields and organisations such as universities, research centres, or companies. COST does not fund research itself, but supports networking via different activities such as meetings, short-term scientific missions, training schools and dissemination products as part of COST Actions. Proposals should reflect the main characteristics of COST Actions, namely, providing for knowledge sharing, creation and application, being excellence-driven, open and output-oriented while aiming at strengthening the scientific and technological basis of the proposed topic(s). Proposals are evaluated against criteria of S&T excellence, networking excellence, impact, and implementation. Proposals for a COST Action must represent a network composed of proposers from at least seven (7) COST Full or Cooperating Members amongst which at least 50% shall be from COST Inclusiveness Target Countries (ITC). Proposals should also respond to the COST Excellence and Inclusiveness Policy, which aims to provide collaboration opportunities to all researchers and innovators in countries that are COST Members. Participation among young talents and next generation leaders is encouraged, in particular promoting working opportunities for young researchers and innovators, and ensure gender balance, paving the way towards breakthrough developments and innovations. The 2025-1 Collection Date is 21 October 2025 at 12:00 - noon (CEST). Up to 70 new

Περίληψη Πρόσκλησης:	Objectives The Big Tickets calls are dedicated calls for proposals under the RFCS programme. Specifically, they implement part of the Research Programme, namely research on innovative technologies for the reduction of CO2 emissions in the steel industrial sector. The RFCS programme is framed around the European Commission's policy objectives, with the European Green Deal (EGD) as the cornerstone. The Commission's EGD Communication is a growth strategy that aims to transform the EU into an equal-opportunity and prosperous society, with a modern, resource-efficient and competitive economy where there are no net emissions of greenhouse gases in 2050 and in which economic growth is decoupled from resource use. The climate neutrality objective is at the heart of the EGD and is a legally binding objective set out in the European Climate Law. The EGD Communication also states that all EU actions and policies should work towards the goal of enabling the EU to achieve a successful and just transition towards a sustainable future. The RFCS legislation is in line with the EGD's objectives; it enables the Fund to tackle the sectors' climate and environmental challenges and to assist the steel industry in reducing emissions. Actions This call covers the following topic: RFCS-2025-CSP-Big Tickets for Steel.

Προθεσμία Υποβολής:	24/06/2025
Περίληψη Πρόσκλησης:	Expected Outcome Projects results are expected to contribute to the following outcomes: For supported doctoral candidates or postdoctoral researchers -Deeper and more diverse set of research-related and transferable skills and competences; -Improved employability and career prospects both within academia and beyond; -New mind-sets and approaches to R&I work forged through international, inter-sectoral and interdisciplinary experience; -Enhanced networking and communication capacities with scientific peers, as well as with the general public that will increase and broaden the research and innovation impact. For participating organisations -Enhanced quality and sustainability of research training; -Increased global attractiveness, visibility and reputation of the participating organisation(s); -Stronger R&I capacity and output among participating organisations; -Increased contribution of the participating organisations to the local, regional and/or national socio-economic ecosystems; -Regular feedback of research results into teaching and education at participating organisations. Scope Applicants submit proposals for new or existing doctoral or postdoctoral programmes with an impact on the enhancement of human resources in R&I at regional, national or international level. These programmes will be co-funded by MSCA COFUND. Proposed programmes can cover any research disciplines ("bottom-up"), but exceptionally can also focus on specific disciplines, notably when they are based on national or regional Research and Innovation Strategies for Smart Specialisation (RIS3 strategies). In this case, the range of covered disciplines should allow reasonable flexibility for the researchers to define their topic. Facility (RRF) are strongly encouraged.

A Career Development Plan must be jointly established by the supervisor and each recruited researcher upon recruitment. In addition to research objectives, this Plan comprises the researcher's training and career needs, including training on transferable skills, teaching, planning for publications and participation in conferences and events aimed at opening science and research to citizens. The Plan must be established at the beginning of the recruitment and should be revised (and updated where needed) within 18 months.

Περίληψη Πρόσκλησης:	Scope: MSCA Staff Exchanges involve organisations from the academic and non-academic sectors (including SMEs) from across the globe. Support is provided for international, inter-sectoral and interdisciplinary mobility of R&I staff leading to knowledge transfer between participating organisations. Mobility through secondments The organisations constituting the partnership contribute directly to the implementation of a joint R&I project by seconding and/or hosting eligible staff members. Such a project must explore activities that can be based on previous work but should go beyond and generate or strengthen long-term collaborations. Secondments must involve physical mobility[1] of the eligible staff members and must always take place between legal entities independent from each other. MSCA Staff Exchanges can address three dimensions of mobility: international, inter-sectoral and interdisciplinary[2]. While exchanges between organisations within EU Member States and Horizon Europe Associated Countries should mainly be inter-sectoral, same-sector exchanges[3] are also possible under the condition that they are interdisciplinary. Interdisciplinarity is not required for same-sector exchanges with non-associated Third Countries. Secondments between institutions established in non-associated Third Countries or within the same EU Member State or Horizon Europe Associated Country are not eligible. The collaborative approach of MSCA Staff Exchanges should exploit complementary competences of the participating organisations and create synergies between them. The secondments should be essential to achieve the joint project's R&I activities. The project should inter alia enable networking activities and the organisation of workshops and conferences, to facilitate sharing of knowledge and testing of innovative approaches for specific R&I topics. Περίληψη Πρόσκλησης:	Objective: You should apply if you are looking for support from EIC Pathfinder Open to realise an ambitious vision for radically new technology, with potential to create new markets and/or to provide solutions for global challenges. EIC Pathfinder Open supports early stage development of such future technologies (e.g., various activities at low Technology Readiness Levels from 1 to 4), based on high-risk/high-gain science-towards-technology breakthrough research (including 'deep-tech'). This research must provide the foundations of the technology you are envisioning. EIC Pathfinder Open may support your work, especially if it is highly risky: you may set out to try things that will not work; you may be faced with questions that nobody knows the answer to yet; you may realise that there are many aspects of the problem that you do not master. On the contrary, if the approach you want to follow is incremental by nature or known, EIC Pathfinder Open will not support you. HORIZON-EIC-2025-PATHFINDEROPEN-EIC Pathfinder 2025
